# OEM 35310-2E000 353102E000 Fuel Flow Injector Nozzle For Elantra

### **Basic Information**

Place of Origin: CHINA
Brand Name: NABO
Certification: TS16949
Model Number: 35310-2E000
Minimum Order Quantity: 10 PCS
Price: \$2.57 ~ \$3.58

 Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box, Standard

tray

Delivery Time: 3~30 work days
Payment Terms: D/P, L/C, T/T

• Supply Ability: 1000000 pcs per month

# **Product Specification**

Product Name: Fuel Injector Nozzle

Size: Standard

Package: Any Color Box As Customers' Requirement

Warranty: 24 Months
 OEM: 35310-2E000
 Car Make: For Hyundai

• Highlight: 35310-2E000, 353102E000

#### **Product Description**

35310-2E000 Fuel Injector Nozzle 353102E000 For Elantra 1.6L 2.0L 06-16

# **Product Description:**

The injector nozzle, commonly referred to as a fuel injector nozzle, is a critical component of a fuel injection system in internal combustion engines. Its primary function is to deliver pressurized fuel into the combustion chamber in a precise and controlled manner. The injector nozzle plays a crucial role in the engine's performance, fuel efficiency, and emissions control.

# **Features:**

- **1. Superior Fuel Atomization:** Our injector nozzle ensures efficient fuel atomization, breaking down the fuel into a fine mist or spray. This process promotes thorough mixing with the incoming air, resulting in improved combustion efficiency, power output, and fuel economy.
- 2. Precise Fuel Flow Control: Our injector nozzle provides precise control over the fuel flow rate, delivering the correct amount of fuel based on the engine's operating conditions. This ensures the ideal air-fuel ratio for optimal combustion, maximizing engine performance and minimizing emissions.
- **3. Optimized Spray Pattern and Angle:** The design of our injector nozzle ensures an optimized spray pattern and angle, facilitating proper fuel distribution and mixing within the combustion chamber. This enhances combustion stability, reduces the risk of fuel impingement on cylinder walls, and promotes efficient fuel utilization.
- **4. Durable and Resilient Construction:** Our injector nozzle is built to withstand the demanding conditions of the engine environment. It is constructed from high-quality materials, such as stainless steel or composite materials, providing excellent durability, resistance to wear, corrosion, and clogging.
- **5. Precise Engineering and Calibration:** Our injector nozzle undergoes precise engineering and calibration to meet the specific requirements of your engine. Flow rates, spray characteristics, and fuel atomization are meticulously calibrated for optimal performance, ensuring reliable fuel delivery and combustion efficiency.
- **6. Compatibility and Ease of Installation:** Our injector nozzle is designed to be compatible with a wide range of vehicle makes and models. It is a direct fit replacement for your original injector nozzle, ensuring a hassle-free installation process and proper integration into your fuel injection system.

# **FAQ:**

#### 1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts, electric parts, steering parts, transmission parts, body parts. . . .

#### 2. How can we guarantee quality?

Always a pre-production sample before mass production; Always final inspection before shipment.

#### 3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years A large of stock Professional export company Accept small order We can design anything well according to customers' requirment
