Precise Auto Steering Tie Rod Wear Resistance 56820-E6000 TS16949

Our Product Introduction

For more products please visit us on automobile-sparepart.com

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 56820-E6000
- Minimum Order Quantity: 100 SETS
- Price: \$2.57~3.57
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Delivery Time: 3~30 work days
- Payment Terms: D/P, L/C, T/T
- Supply Ability: 50000 pcs per month

Product Specification

- Product Name: Tie Rod End
- Car Make: For Hyundai Kia
- Warranty: 12 Months
- Quality: 100% Tested
- Packing: Poly Bag With Carton, After Pallet
- Application: Automobile
- Highlight: **Precise Steering Tie Rod, Auto Steering Tie Rod , Auto Tie Rod Wear Resistance**

Product Description

56820-E6000 Tie Rod End Fit For SONATA Optima

Product Description:

A **tie rod end** is a crucial component of a vehicle's steering system. It is located on either the left or right side of the steering assembly, connecting the steering linkage to the steering knuckle or spindle.

The **tie rod end** plays a significant role in providing optimal steering control and stability, as it facilitates the smooth and precise steering movements. Its importance lies in its ability to encourage flexible steering components, and effectively transfer the motion from the steering wheel to the wheels.

In short, the **tie rod end** is a required component of a car's steering system, necessary for efficient and responsive steering.

Features:

We know that our tie rod end must be able to withstand the demands of daily driving, so we make sure to use only the best materials, such as forged or cast steel, to ensure long-lasting durability and resistance to wear, impact, and corrosion.

The tie rod end is a critical component of the steering system as it converts the driver's input into smooth and precise steering movements. Our tie rod end features an accurate design and a tight ball joint or bushing mechanism, providing the highest levels of steering control and responsiveness.

Selecting the right tie rod end will depend on the vehicle's model. We have both ball joint and bushing-style tie rod ends available, so you can be sure that you are getting the best design for your vehicle. The ball joint option allows for articulation and rotational movement, while the bushing-style design offers excellent flexibility and vibration dampening.

Our tie rod end is designed for ease of installation. All necessary hardware and installation instructions are included in the package, so you can tackle the job yourself if you're a DIY enthusiast, or you can take it to a professional mechanic.

Support and Services:

Tie Rod End Technical Support and Service

We provide technical support and service for Tie Rod End.

Our technical team can answer any of your questions about product specifications, installation, and maintenance.

We offer a variety of services including troubleshooting, product customization, and warranty services.

We also provide product and application training, and after-sales service.

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;

Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years
