

Strut Mount 54630-3K000 546303K000 Rubber And Steel Material

Our Product Introduction

For more products please visit us on automobile-sparepart.com

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 54630-3K000
- Minimum Order Quantity: 10 PCS
- Price: USD3.57 ~ USD4.58
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Delivery Time: 3~30 work days
- Payment Terms: D/P, L/C, T/T
- Supply Ability: 1000 pcs per day

Product Specification

- Product Name: Auto Strut Mount
- Car Make: For Hyundai
- Packing: Any Box According To Customers' Requirement
- Material: Rubber And Steel
- Warranty: 24 Months
- Highlight: 54630-3K000, 546303K000

Product Description

54630-3K000 Strut Mount for HYUNDAI GRANDEUR H-1 ix55 SANTA FE II KIA CARNIVAL III 546303K000

Product Description:

Strut Mount

A strut mount, also known as a suspension mount or shock mount, is an essential component for a vehicle's suspension system. It acts as a link between the strut assembly and the vehicle's chassis or body. The strut mount plays a significant role in contributing to the support, stability, and damping vibrations of the suspension system.

The strut mount performs important functions. It is responsible for holding the suspension components of a car together and reducing their impact. It also functions as an absorber, protecting the car's body and passengers from road shocks and rough roads. Furthermore, the strut mount helps to lessen noise and vibration from the engine and suspension system, making the ride more comfortable and enjoyable.

It is important to maintain a properly working strut mount. If the mount is loose, worn out, or damaged, it can affect the stability and performance of the vehicle. Furthermore, the lack of proper maintenance may even lead to costly repair bills.

Features:

Our strut mount serves as a strong connection point between the strut assembly and the vehicle's chassis or body, providing secure and stable attachment for the strut assembly to effectively absorb shocks, impacts, and vibrations from the road surface.

Our strut mount is engineered with high-quality rubber or polyurethane bushings for damping vibrations and reducing noise generated by the suspension system. These bushings absorb and minimize the transmission of vibrations to the vehicle's body, creating a smoother and more comfortable ride.

Our strut mount is designed to evenly distribute the load and forces exerted on the strut assembly, preventing overbearing weight on any single point and optimizing the stability and performance of the suspension system.

Our robust strut mount can hold the suspension alignment by providing controlled movement and articulation of the strut assembly. This maintains the correct alignment of the wheels with the road surface, promoting even tire wear, improved handling, and greater vehicle stability.

Our strut mount is made with highly durable materials and passes stringent tests to ensure long-lasting dependability. It is designed to withstand regular driving, providing your suspension system superior support and stability for many years to come.

Support and Services:

Auto Strut Mount's technical support and services include:

Answering any questions about the product

Providing guidance on installation and maintenance

Replacing any faulty parts

Assisting with troubleshooting any problems

Providing software updates

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specializing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts, electric parts, steering parts, transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;

Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+ years
