

## 16210-66020 Cooling Fan Clutch For TOYOTA LAND CRUISER 1FZ FZJ70

Our Product Introduction

For more products please visit us on [automobile-sparepart.com](http://automobile-sparepart.com)

### Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 16210-66020
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Payment Terms: D/P, L/C, T/T

### Product Specification

- Product Name: Cooling Fan Clutch
- Size: Standard
- Warranty: 12 Months
- Highlight: 16210-66020 Cooling Fan Clutch ,  
TOYOTA LAND CRUISER Cooling Fan Clutch

## Product Description

### Product Description:

#### Cooling Fan Clutch

The cooling fan clutch is an essential part of automobile engines. Its main job is to control the engine cooling fan's speed and operation in accordance with the engine's cooling needs.

The cooling fan clutch is situated between the radiator and the engine, and it is linked to the fan blades. It consists of three main components: a viscous fluid coupling, a thermal sensor, and a temperature-sensitive bi-metallic coil spring.

### Features:

#### Temperature Control

Our fan clutch is equipped with a precision-engineered thermal sensor that accurately measures the temperature of the engine coolant. This technology allows the clutch to engage and disengage at the appropriate times, ensuring efficient cooling without unnecessary power consumption.

#### Enhanced Cooling Efficiency

With a robust design and advanced technology, our fan clutch maximizes the airflow through the radiator. This increased airflow helps dissipate heat more effectively, preventing engine overheating and maintaining optimal operating temperatures.

#### Durable Construction

We pride ourselves on using high-quality materials and precision manufacturing techniques to ensure the longevity and durability of our fan clutch. It is built to withstand the demands of daily driving, extreme temperatures, and harsh conditions, providing reliable performance over an extended period.

#### Smooth and Quiet Operation

Our fan clutch is engineered to deliver smooth and quiet operation, minimizing vibrations and noise. This not only enhances your driving experience but also ensures a comfortable ride.

#### Engineered for Performance

Designed to optimize the performance of your vehicle's cooling system, our fan clutch helps increase the efficiency of the radiator. This allows your engine to operate at its best, preventing potential damage caused by overheating.

### FAQ:

#### 1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

#### 2. How can we guarantee quality?

Always a pre-production sample before mass production;

Always final inspection before shipment.

#### 3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years
