

Auto part Engine Cooling Water Pump MD979171 For MITSUBISHI PAJERO III

Our Product Introduction

For more products please visit us on automobile-sparepart.com

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: MD979171
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Delivery Time: 3-35 days
- Payment Terms: D/P, L/C, T/T

Product Specification

- Product Name: Engine Water Pump
- Size: Standard
- Warranty: 12 Months

Product Description

Product Description:

The engine water pump plays a pivotal role in your vehicle's temperature regulation, serving as the cornerstone of the cooling system. Its duty lies in propelling the coolant through the engine's chambers, maintaining an ideal temperature for operation and averting the risk of the engine overheating.

At the heart of the engine water pump's operations is its ability to ensure a consistent flow of coolant into the engine and its radiator. This is achieved through a belt which is typically linked to the engine's crankshaft or to a timing belt/chain that ensures the pump is in action. While in motion, the water pump generates the required pressure to channel the coolant between the radiator and the engine, thus completing an efficient cooling loop.

Features:

Efficient Coolant Circulation

The Engine Water Pump we provide is engineered to effectively circulate coolant through the engine. Its main role is to ensure optimal cooling and temperature management. By efficiently moving heat away from the engine's core, it prevents overheating and sustains engine performance. This is crucial for the vehicle's longevity and reliability.

Quality Construction

Crafted with superior materials, our Engine Water Pump is built to last. It boasts a sturdy housing, an impeller designed with precision, and reliable bearings that endure the tough demands of the engine's cooling system. These high-quality components come together to deliver enduring performance, giving you peace of mind that the pump will stand the test of time.

Reliable Sealing

We've also equipped our Engine Water Pump with a top-tier seal to eliminate the risk of coolant leakage. This sealing technology is crucial in maintaining the right pressure within the pump and ensuring a consistent flow of coolant. It's another way we ensure your engine operates efficiently, without the worry of leaks or pressure loss.

Rigorous Quality Control

To guarantee performance and dependability, our Engine Water Pump undergoes stringent quality control checks. Manufacturing adheres to, and often surpasses, OEM specifications. This meticulous process provides you with assurance in the pump's functionality and its seamless integration with your vehicle.

Cost-Effective Solution

Offering great value, our Engine Water Pump is a cost-effective choice for maintaining your engine's cool. It delivers dependable performance without a hefty price tag, keeping your vehicle's engine in top shape economically. Opt for our reliable solution and experience both savings and quality.

Applications:

Optimize Your Cooling System

Give your vehicle's cooling system a significant upgrade with our top-of-the-line **Engine Water Pump**. Our product is designed to deliver unparalleled efficiency in coolant circulation, guaranteeing that your engine operates at the ideal temperature.

Peak Engine Performance

By maintaining an optimal engine temperature, our Engine Water Pump contributes to enhanced engine performance. Expect not only a well-regulated cooling system but also a boost in your engine's overall output, thanks to the meticulous engineering of our pump.

Dependable and Durable

Confidence in your coolant system's reliability is non-negotiable. That's why our **Engine Water Pump** is built to last. Rely on it for a consistent and effective coolant flow, safeguarding your engine's longevity and efficiency for the long haul.

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;

Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years
