## A1665000091 Engine Radiator Coolant Water Overflow Hose For Mercedes Benz W166 X166

Our Product Introduction

For more products please visit us on [automobile-sparepart.com](http://automobile-sparepart.com)

### Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: A1665000091
- Minimum Order Quantity: 10 PCS
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Delivery Time: 3-30 days
- Payment Terms: D/P, L/C, T/T
- Supply Ability: 50000 pcs per month

### Product Specification

- Application: Radiator Water Pipe
- Brand: OEM
- Pressure Rating: 1.6MPa
- Size: Standard
- Temperature Rating: 150

## Product Description

### Product Description:

Introducing our exceptional Water Coolant Hose Water Pipe – a crucial component specially designed to transport coolant fluid throughout your vehicle's cooling system, ensuring engine performance is optimised. We offer high-quality water coolant hose water pipes that are manufactured with precision and robustness, guaranteeing reliable performance and trustworthy cooling.

Our water coolant hose water pipe undergoes a rigorous manufacturing process that ensures that it will be able to withstand high-pressure, high-temperature environments without fail. With our water coolant hose water pipe, your vehicle's engine will remain at the optimum operating temperature, reducing wear and tear and increasing engine life.

Our vast experience and expertise in the field of automobile components enable us to provide only the best water coolant hose water pipes to our customers. We are confident that these high-quality pipes, designed with precision and durability in mind, will exceed all your expectations.

#### Features:

**Precision engineering**

**Durability and reliability**

**High-quality manufacturing**

**Optimised engine performance**

**Reduces wear and tear, increasing engine life**

### Features:

#### Superior Construction

Our water coolant hose water pipe boasts superior construction using high-quality materials, such as reinforced rubber or silicone. This ensures resistance to heat, pressure, and coolant chemicals. This robust construction results in strength, flexibility, and long-lasting performance under demanding operating conditions.

#### Efficient Coolant Flow

The water coolant hose water pipe plays a crucial role in circulating coolant fluid between the engine, radiator, heater core, and other cooling system components. It accelerates the transfer of heat away from the engine, enabling proper engine temperature regulation and preventing overheating.

#### Leak and Burst Resistance

Our water coolant hose water pipe is specially designed to withstand high pressures and temperature fluctuations, minimizing the risk of leaks and bursts. It features reinforced layers and durable connectors that provide a secure and reliable connection, enhancing the overall integrity of the cooling system.

#### Temperature and Chemical Resistance

The water coolant hose water pipe is engineered to endure extreme temperature changes and exposure to coolant chemicals. It resists deterioration, swelling, and cracking, ensuring consistent coolant flow and preventing coolant contamination.

#### Easy Installation

Our water coolant hose water pipe is designed for straightforward installation, making it suitable for professional mechanics and DIY enthusiasts alike. It's a direct fit replacement for your vehicle's original water pipe, ensuring compatibility and a hassle-free installation process.

#### Quality Assurance

Our water coolant hose water pipe is subject to rigorous testing and quality control measures to meet or exceed industry standards. It is manufactured by trusted suppliers who prioritize quality and performance, providing you with a reliable and durable product.

### Technical Parameters:

Brand:	OEM
Temperature Rating:	150
Application:	Radiator Water Pipe / Automotive Coolant Pipe / Radiator Coolant Tube
Size:	Standard
Pressure Rating:	1.6MPa

### Support and Services:

The Radiator Water Pipe is a crucial component of the vehicle's cooling system. Our technical support team is available to assist with any issues or questions related to the installation, maintenance, or performance of the product.

Our services include:

**Expert advice on installation and maintenance**

**Assistance with identifying and resolving any performance issues**

**Warranty and replacement options**

Our goal is to ensure that our customers have a positive experience with our products and feel confident in their vehicle's performance. Please do not hesitate to reach out to our technical support team for any assistance.

## **FAQ:**

### **1. Who are we?**

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

### **2. How can we guarantee quality?**

Always a pre-production sample before mass production;

Always final inspection before shipment.

### **3. Why should you buy from us from other suppliers?**

We have experience in spare parts for more than 10+years

**A large of stock**

**Professional export company**

**Accept small order**

**We can design anything well according to customers' requirment**

## **PRODUCT SPECIFICATIONS**

MAIN PRODUCT

## BRAKE SYSTEM

Brake Pad

Brake Shoe

Brake Disc

Brake Repair Kit

Brake Booster

Brake Cable

Brake Master  
Cylinder

Brake Slave  
Cylinder

## TRANSMISSION SYSTEM

Drive Shaft

Propeller Shaft

Wheel Hub Bearing

Cv Joint

Clutch Set

Clutch Master  
Cylinder

Clutch Release  
Bearing

Universal Joint

## SUSPENSION SYSTEM

Shock Absorber

Shock Absorber  
Spring

Strut Mount

Tie Rod End

Bushing

Control Arm

Ball Joint

Rack End

## STEERING SYSTEM

Power Steering  
Rack

Power Steering  
Pump

Steering Knuckle

Steering Column  
Shaft

Steering Gear  
Boots

Oil Control Valve

Oil seal

Steering Hose
