## 5Q0965561B Engine Water Pump Auto Component Auxiliary Coolant Water Pump FOR AUDI A3 A4 A5 A6 VW

Our Product Introduction

For more products please visit us on [automobile-sparepart.com](http://automobile-sparepart.com)

### Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 5Q0965561B
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Delivery Time: 3-35 days
- Payment Terms: D/P, L/C, T/T

### Product Specification

- Name: Automobile Spare Parts
- Type: Engine Water Pump
- Warranty: 12 Months
- Country Of Origin: China
- Size: Standard

## Product Description

### Product Description:

An engine water pump plays a crucial role in the efficiency of a vehicle's cooling system. Essentially, it is responsible for circulating coolant fluid throughout the engine to ensure that the engine maintains an optimal operating temperature and prevent overheating. With its ability to produce the needed pressure to circulate coolant fluid, an engine water pump is critical to the health and overall performance of an engine.

At the heart of an engine water pump's job is the circulation of coolant throughout the engine and radiator. The pump is usually powered by a belt that connects to the engine's crankshaft or timing belt/chain. As it rotates, the pump creates sufficient pressure to move the fluid from the radiator into the engine, while also maintaining an adequate cooling cycle. This cyclic movement of coolant helps in dissipating the heat that is generated by the engine while running or in operation.

### Features:

**Efficient Coolant Circulation:** Our Engine Water Pump is designed to efficiently circulate coolant throughout the engine, ensuring optimal cooling and temperature regulation. This effectively transfers heat away from the engine components, preventing overheating and maintaining engine performance.

**Quality Construction:** Our Engine Water Pump is constructed with high-quality materials and components to ensure its durability and long-lasting performance. It features a robust housing, a precision-engineered impeller, and reliable bearings that can withstand the demands of the cooling system.

**Reliable Sealing:** Our Engine Water Pump is equipped with a high-quality seal that effectively prevents coolant leaks. This seal ensures that the coolant remains inside the pump, maintaining the proper pressure and coolant flow throughout the engine.

**Rigorous Quality Control:** Our Engine Water Pump undergoes rigorous quality control testing to ensure its performance and reliability. It is manufactured to meet or exceed OEM standards, providing you confidence in its functionality and compatibility with your vehicle.

**Cost-Effective Solution:** Our Engine Water Pump offers exceptional value for money. It provides reliable performance at a competitive price, allowing you to maintain the cooling efficiency of your vehicle's engine without breaking the bank.

### Technical Parameters:

Type	Engine Water Pump
Size	Standard
Warranty	12 Months
Name	Automobile Spare Parts
Country of Origin	China

### Applications:

**Upgrade your vehicle's cooling system with our premium Engine Water Pump.** With our high-quality Engine Water Pump, you can experience efficient coolant circulation that optimizes engine temperature control and increases engine performance.

**Trust in the durability and reliability of our Engine Water Pump.** Our product provides consistent and effective coolant flow by regulating your engine's temperature, which ultimately contributes to the longevity and efficient operation of your engine. With our Engine Water Pump, you can ensure that your vehicle's cooling system is up-to-date and functioning at its best.

### Support and Services:

Our company offers comprehensive technical support and services for our automobile spare parts products. Our team of experienced technicians and engineers are dedicated to providing exceptional assistance to our customers in resolving any issues they may encounter with our products. We also offer installation guidance and maintenance recommendations to ensure optimal performance and longevity of our products. Additionally, we provide repair and replacement services for any defective parts under warranty. Our goal is to provide our customers with the highest quality products and support to ensure their satisfaction.

### FAQ:

#### 1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

#### 2. How can we guarantee quality?

Always a pre-production sample before mass production;  
Always final inspection before shipment.

#### 3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years
