

2712001552 Radiator Water Pipe with Temperature and Pressure Rating

Our Product Introduction

For more products please visit us on automobile-sparepart.com

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 2712001552
- Minimum Order Quantity: 10 PCS
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Delivery Time: 3-30 days
- Payment Terms: D/P, L/C, T/T
- Supply Ability: 50000 pcs per month

Product Specification

- Application: Radiator Water Pipe
- Pressure Rating: 1.6MPa
- Temperature Rating: 150
- Size: Standard
- Brand: OEM

Product Description

Product Description:

Introducing Our High-Quality Water Coolant Hose Water Pipe

Our water coolant hose water pipe is an essential component designed to transport coolant fluid throughout your vehicle's cooling system. It plays a critical role in ensuring your engine runs at an optimal temperature to avoid overheating and damage.

We take pride in offering a high-quality product that has been engineered with precision and durability to provide reliable performance and efficient cooling. Our water coolant hose water pipe is made from top-quality materials that meet or exceed industry standards for strength and longevity.

When you choose our water coolant hose water pipe, you can trust that it will withstand the demands of everyday use and harsh operating conditions. It has been rigorously tested to ensure it can handle the pressures and temperatures associated with normal engine operation. Choose our water coolant hose water pipe to keep your engine cool and running smoothly. We are confident that our product will meet or exceed your expectations and offer a reliable solution for your cooling system needs.

Features:

Superior Construction:

Our water coolant hose water pipe is crafted from high-quality materials, such as reinforced rubber or silicone, that are resistant to heat, pressure, and coolant chemicals. This construction ensures strength, flexibility, and long-lasting performance in demanding operating conditions.

Efficient Coolant Flow:

The water coolant hose water pipe is responsible for circulating coolant fluid between the engine, radiator, heater core, and other cooling system components. It facilitates the transfer of heat away from the engine, ensuring proper engine temperature regulation and preventing overheating.

Leak and Burst Resistance:

Our water coolant hose water pipe is designed to withstand high pressures and temperature fluctuations, minimizing the risk of leaks or bursts. It features reinforced layers and sturdy connectors that provide a secure and reliable connection, enhancing the overall integrity of the cooling system.

Temperature and Chemical Resistance:

The water coolant hose water pipe is engineered to withstand extreme temperature variations and exposure to coolant chemicals. It resists deterioration, swelling, and cracking, ensuring consistent coolant flow and preventing coolant contamination.

Easy Installation:

Our water coolant hose water pipe is designed for straightforward installation, making it suitable for both professional mechanics and DIY enthusiasts. It is a direct fit replacement for your vehicle's original water pipe, ensuring compatibility and a hassle-free installation process.

Quality Assurance:

Our water coolant hose water pipe undergoes rigorous testing and quality control measures to meet or exceed industry standards. It is manufactured by trusted suppliers who prioritize quality and performance, providing you with a reliable and durable product.

Technical Parameters:

Brand	OEM
Application	Radiator Water Pipe
Size	Standard
Temperature Rating	150
Pressure Rating	1.6MPa

Support and Services:

Our technical support team is available to assist with any questions or concerns regarding the installation or operation of our Radiator Water Pipe product. We also offer repair services and replacement parts as needed. Our team is knowledgeable and experienced in dealing with any issues that may arise with our product, and we are committed to providing excellent customer service. Please do not hesitate to contact us if you require any assistance.

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for

example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;

Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years
