2205000003 2205000103 Aluminum Car Radiator Automotive Spare Parts for Vehicle Cooling System for Mercedes-BENZ

Basic Information

- Place of Origin:
- Brand Name: NABO
 Certification: TS16949
- Model Number: 2205000003 2205000103

CHINA

- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
 Delivery Time: 3-35 days
- Payment Terms: D/P, L/C, T/T

Product Specification

Material:	Aluminum
• Type:	Car Radiator
Country Of Origin:	China
Warranty:	12 Months
• Size:	Standard
Name:	Automobile Spare Parts

Our Product Introduction

Product Description:

A car radiator is a vital element of a vehicle's cooling system that plays a crucial role in regulating the engine's temperature. The radiator works by dissipating the heat generated during the combustion process, which helps prevent the engine from overheating.

A typical car radiator is composed of a core that consists of thin metal tubes or channels that are connected to inlet and outlet tanks. The core is typically made of aluminum, which has high thermal conductivity, while the tanks are usually made of plastic or aluminum.

The primary function of a car radiator is to cool the engine by transferring the heat from the coolant that is circulating through the engine to the surrounding air. The radiator achieves this through a combination of conduction, convection, and radiation.

Features:

Efficient Heat Dissipation

Our Car Radiator is designed with a high-density core constructed from thin metal tubes and cooling fins. This ensures maximum surface area for heat transfer, which results in efficient dissipation of the heat generated by the engine. The design effectively cools the coolant as it passes through the radiator, maintaining the optimal operating temperature for your vehicle.

Durable Construction

Our radiator is built for long-lasting performance. It features a sturdy and corrosion-resistant aluminum core that provides excellent heat conductivity and durability. The inlet and outlet tanks are made from high-quality materials to ensure durability and reliable performance.

Enhanced Cooling Performance

Our Car Radiator is designed for optimal cooling efficiency. The arrangement of tubes, fins and coolant flow paths is optimized to maximize the performance of the cooling system. This ensures that your engine remains at a safe and consistent temperature, preventing the risk of overheating and potential engine damage.

Quality Assurance

We have strict quality control processes in place to guarantee that our Car Radiators meet the highest standards of reliability and performance. Each radiator undergoes thorough testing to ensure optimal cooling efficiency and durability, so you can be assured of a dependable and effective product.

Warranty

We stand behind the quality of our Car Radiators and offer a warranty to provide you with peace of mind. We guarantee against any manufacturing defects or faults to ensure that your radiator is covered in case of any issues.

Applications:

Looking to give your vehicle's cooling system an upgrade? Look no further than our premium Car Radiator. With our product, you can expect an improved cooling performance and optimal engine temperature, ensuring reliable operation.

You can trust in the durability and efficiency of our Car Radiator to keep your engine running smoothly and extend the life of your vehicle. Say goodbye to overheating and hello to an enhanced and reliable driving experience with our Car Radiator.

Don't settle for an outdated or inefficient cooling system in your vehicle. Upgrade now with our premium Car Radiator and enjoy the peace of mind that comes with an optimized engine performance.

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts, electric parts, steering parts, transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production; Always final inspection before shipment.

3. Why should you buy from us from other suppliers? We have experience in spare parts for more than 10+years
